EDUCATION

Charles University, Faculty of Mathematics and Physics

Prague

BSc in Financial Mathematics

Sep 2026 – Jun 2029 (expected)

- First-semester coursework: Mathematical Analysis, Linear Algebra, Accounting, Programming, Mathematical Proseminar; year-one elective Practical Aspects of Financial Risk Measurement and Management (NMFP463, taught by practitioners).

Gymnázium Christiána Dopplera

Prague

Mathematics, physics and computer science track

Sep 2022 – Jun 2026

- Maturita with distinction in Mathematics, Programming and English; Cambridge CAE (C1).
- Final-year research paper (top grade): quantitative model of EU ETS 2 allowance-cost pass-through to fuel prices (LRF, MSR, front-loading); showed the Social Climate Fund offsets only ~22% of the real price increase for vulnerable households.

EXPERIENCE

Valor Group

Prague

Trainee, Financial Advisory

Jun 2026 – Sep 2026

- Modelled client financial plans (insurance and investment products) and household budgets; prepared materials for and joined client meetings.
- Analysed a CZK 1m six-fund portfolio (50% bonds / 34% real estate / 16% equities) fund by fund: weighted TER ~1.35% p.a., duration, liquidity, risk types and rate scenarios; delivered as an interactive client presentation.
- Built the firm's content engine: JSON-driven Python (PIL) carousels with automated QA and Remotion videos.

Cloudinfrastack

Prague

DevOps & Infrastructure (contract)

Apr 2026 – May 2026

- Supported hardware and cloud virtualisation operations, CI/CD automation and Linux server administration.

Freio (freio.cz)

Prague

Co-Founder, Business & Strategy

Feb 2026 – Jul 2026

- Co-founded an EdTech platform for Czech university admission (SCIO) test preparation; owned business strategy, market validation and customer segmentation.
- Built the first MVP website and led initial marketing; exited by mutual agreement with an equity settlement.

Freelance

Prague

Software & AI Automation

Jan 2026 – Present

- Delivered scraping and data pipelines (Playwright, BeautifulSoup) and LLM API integrations (OpenAI, Anthropic).
- Automated content and e-mail personalisation workflows, cutting manual preparation time by over 60%.

Božíří (bozii.com)

Prague

Founder & Full-Stack Developer

Sep 2025 – Present

- Designed, built and launched a community platform connecting Prague parishes with people arranging sacraments; automated enquiry routing (Resend, Redis) cut response waiting time by over 58%.
- Onboarded three parishes (Dejvice, Hlubočepy, Chodov), replies under 24 hours; Next.js 15, React 19, TypeScript.

Sauna & Wellness Rooms Central

Prague

Shift Supervisor (part-time)

Oct 2024 – Present

- Managed cash on site, ran daily closings and till reconciliation; led the shift team.

PROJECTS

Quantitative tools (web, vanilla JS)

2026

- Black–Scholes option pricer with Greeks; Monte Carlo GBM path simulator with a Merton jump-diffusion (crash) mode, 5% VaR and expected shortfall; Markowitz efficient frontier with an estimation-error sensitivity view.

Training operations PWA

2026

- Built a private Next.js 15 / Postgres (Drizzle) PWA that syncs Garmin Connect telemetry via cron, computes training load (ACWR, CTL/ATL) and fuelling needs, and uses the Anthropic API for adaptive weekly plans.

SKILLS & INTERESTS

Programming: Python, TypeScript/JavaScript, C#, SQL, Next.js/React, FastAPI, Git, Linux; LLM APIs; web scraping

AI engineering: Claude Code, Claude Cowork, Google Antigravity (building with AI agents since 10/2025); Anthropic API (structured output, cost limits, testing); MCP; Anthropic Claude Academy certificates of completion planned

Quantitative: Black–Scholes, Monte Carlo, Markowitz optimisation, VaR and expected shortfall; probability and statistics, linear algebra

Languages: Czech (native), English (C1, Cambridge CAE), German (A2)

Interests: half marathon 1:24 and backyard ultra training, 11 years of competitive baseball, poker and game theory
